Acajoom News - [Acajoom.com](http://www.acajoom.com)

Acajoom News is one of the most popular newsletter components for Joomla!. The installation is very easy, and comes with a very user-friendly interface to boot. It can handle an unlimited number of newsletters with an unlimited number of subscribers effortlessly. It is perfect for beginners looking to start a newsletter for their sites.

Download Here:

<http://www.acajoom.com/content/blogcategory/13/71/>

Acajoom Plus - [Acajoom.com](http://www.acajoom.com)

Acajoom Plus is the first sequential autoresponder system for the Joomla! CMS. It automates communication with users of your sites and includes all the features of Acajoom News. You can now schedule your newsletters to be sent out at a later date, whenever you want. Installation is a breeze, and customer support is fantastic, so it is very beginner-friendly.

Download Here:

<http://www.acajoom.com/content/view/5257/1/>

AEC - [Globalnerd.org](http://www.globalnerd.org)

The AEC is a component that handles subscriptions to your Joomla! Website. It is largely customizable with CSS Styling and Language Files, Custom Text and Custom Pages. AEC currently works with Docman and JoomlaBoard. AEC also supports trials for your members, so it is a very comprehensive subscription extension.

Download Here:

http://www.globalnerd.org/index.php?option=com_content&task=view&id=17&Itemid=34

Affiliate Link Cloaker - [Brewsterware.com](http://www.brewsterware.com)

The Affiliate Link Cloaker solves the problem of affiliate commission theft by turning your target URL into unreadable gibberish. It also uses javascript to prevent the target URL from appearing in the status bar. The method only takes about 5 minutes to implement is a nifty way for affiliate marketers using Joomla! as their website platforms.

Download Here:

<http://www.brewsterware.com/pages/affiliatelinkcloaker.html>

Artio JoomSEF – [Artio.cz](http://www.artio.cz)

This extension will rewrite your Joomla! URLs into a more human friendly form, which at the same time enhances its SEO value. A multi-language interface support is included, and updates can be made online easily. It also offers API for adding SEF functionality for other 3rd party Joomla! modules easily. This is a great plugin for Joomla! users who wish to make their sites more prominent in the search engines.

Download Here:

<http://www.artio.cz/en/downloads/joomla-extensions/>

AllVideosPlugin - [Joomlaworks.gr](http://www.joomlaworks.gr)

The AllVideos Plugin gives you the ability to easily embed online streaming videos/audios within your webpage as well as have your own videos/audios uploaded on your server. No HTML is required at all and all you have to do is to place tags within our content where you want the videos or audios to appear. There are two ways you can use the AllVideosPlugin. If you want to save on your bandwidth, simply upload your videos to a Youtube.com and then embed the video onto your own webpage with the plugin. An alternative will be upload the video itself to your website, after which you can stream the audios/videos via simple tags. One common complaint is that only 10 videos are allowed per page for this plugin. As long as that is not a problem, the AllVideosPlugin is very useful for all your videos/audios streaming needs.

Download Here:

<http://www.joomlaworks.gr/>

Community Builder - [Joomlapolis.com](http://www.joomlapolis.com)

Community Builder has been lauded as one of the best extensions for Joomla!. Key features include extra fields in profile, enhanced registration workflows, user lists, connection paths between users, admin defined tabs and user profiles, image upload, front-end workflow management, integration with other components, like PMS, Newsletter, Forum and Galleries. Overall, it is a great addition to the Joomla! user management system.

Download Here:

http://www.joomlapolis.com/component/option,com_docman/Itemid,36/

AWeber Joomla! Module - [Coderseye.com](http://coderseye.com)

This module integrates Joomla! with AWeber. AWeber offers what is probably the best autoresponder service on the internet, with a delivery rate of 95-99%. There is only one manual step required to make the module work, so it is very user-friendly. This is a must-have component for AWeber users.

Download Here:

<http://coderseye.com/2006/aweber-joomla-module.html>

Content Item Module - [Diebesteallerzeiten.de](http://diebesteallerzeiten.de)

This extension allows you to publish your content to areas other than mainBody(). You have the choice of displaying a single item, all items from a category, all items from a section, or a number of content items/categories/sections specified by a comma separated list of ids. Simply enter the content item ID in the module's parameters field, assign a position to the module, and publish it. You can copy the module and assign a different name, position and contentitem id to the copy. A "read more" link option is included as well. You are also able to merge multiple content items into one document for easy management. A table of contents for the merged items can also be created. This is user for Joomla! users who wish to make their sites stand out from the crowd.

Download Here:

<http://www.diebesteallerzeiten.de/module.html>

Autopopulate – [Joomlancode.org](http://joomlancode.org)

The Autopopulate extension is a very welcome alternative to the ReMOSitory. It allows you to add thousands of files to DOCMan with a mere few clicks. If you need to handle multiple documents on a consistent basis, this extension is a must.

Download Here:

<http://joomlancode.org/gf/project/autopopulate/frs/>

DOCMan – [Joomlancode.org](http://joomlancode.org)

DOCMan is the most widely used document management and download system for Joomla!. With this extension, your users will be able to manage and transfer files across multiple categories. This is a must-have extension for Joomla!-powered sites.

Download Here:

<http://joomlancode.org/gf/project/docman/frs/>

DOCMan patch for Open SEF – [Open-sef.org](http://open-sef.org)

This extension allows for advanced SEF URLs. It is useful for advanced users who wish to further improve the usability of their sites, but is not necessary for beginning webmasters.

Download Here:

<http://forum.j-prosolution.com/announcements/745-docman-advanced-sef-file-opensef-released-version-2-now-available.html>

ECJoomlaCommerce - [Joomla-host.co.za](http://joomla-host.co.za)

This extension facilitates OSCommerce for your Joomla! powered sites. Installation has been said to be advanced, so beginners might want to seek some help or have a backup of the site before attempting. Despite the clumsy installation, the developers are very diligent and will help you with any problems that you might occur, and are steadily producing updates to improve on older versions. All in all, one of the best, if not the best, open-source shopping carts for Joomla!.

Download Here:

<http://www.joomla-host.co.za/downloads/ecjc-component/3.html>

EXP Templates - [Feellove.eu](http://feellove.eu)

EXP Templates is an extension that allows you to create your own templates for your sites. This is much cheaper than hiring a programmer to do it for you, and you can alter the templates to your liking for an unlimited number of times. A great extension for beginning users who need to design their own templates but have limited programming skills.

Download Here:

<http://www.feellove.eu/exptemp/>

Extended Menu - [De.siteof.de](http://de.siteof.de)

The Extended Menu extension allows you to customize your menu in any way at all. This powerful and flexible extension is very customizable, but at the same time extremely difficult to use, and does not seem to be compatible with IE7. Definitely an extension for the advanced Joomla! user, as the finer aspects are very difficult to grasp.

Download Here:

http://joomlaocode.org/gf/project/extended_menu/frs/

FacileForms - [Facileforms.biz](http://www.facileforms.biz)

Facilforms is an extensions that can be used to generate simple forms easily without programming knowledge. A flash tutorial is available on the Homepage. Many tutorials and articles are available in the Wikias well. In the forums, you can also get help from other users and a dedicated team of moderators. Knowledge of mySQL and PHP is required to get the best use out of the extension, but with the large amount of help available, even beginners should be able to use this with ease.

Download Here:

http://www.facileforms.biz/component/option,com_docman/task,cat_view/gid,89/Itemid,96/

HP ToDo list - [Joomlager.de](http://www.joomlager.de)

The HP ToDo list is a very simple extension that does exactly what it's meant to do, and not much else. Its beauty lies in its simplicity. It is an amazing administration module which is extremely useful for admins to keep track of what needs to be done. Especially useful for sites where a large team of administration personnel is involved.

Download Here:

http://joomlancode.org/gf/project/hp_tools/frs/?action=FrsReleaseBrowse&frs_package_id=14

Project Fork - [Projectfork.net](http://www.projectfork.net)

Project Fork is a Project Management Solution for Joomla!, formerly known as Hydra. It allows you to share your ideas online with other users. It is also extremely easy to set up, despite its amazing array of features. It takes some time to learn all the features of this extension but once mastered, it can take the place of multiple extensions, including DOCMan. On the flip side, the abundance of features might cause confusion for beginners.

Download Here:

http://www.projectfork.net/component/option,com_docman/task,cat_view/gid,37/Itemid,59/

Joomla Content Editor - [Cellardoor.za.net](http://www.cellardoor.za.net)

Joomla Content Editor is a WYSIWYG editor for Joomla! based on Moxiecode's TinyMCE. The image uploader plugin is extremely useful and even allows resizing and editing. One of the most popular content editors available, and is very easy to use.

Download Here:

<http://www.cellardoor.za.net/>

Jombackup - Jomres.net

Jombackup is an extension used for performing daily mysql backups and emailing them to an address of your choice. You can use the cron jobs function to enable daily backups Joomla! MySQL data. This is a must-have extension to safeguard all your precious data in your databases. It is easy to install as well, and works like a charm.

Download Here:

http://www.jomres.net/index.php?option=com_docman&task=doc_details&gid=72&Itemid=79

Jomres Booking Management System - Jomres.net

Jomres is the unrivaled leader of the Joomla booking applications, offering more power and functionality than any other system in it's class. It has been designed primarily for taking bookings for hotels, bed and breakfasts, guest houses, cottages and villas. Jomres can be used for taking reservations for anything that is booked by the day. A nifty extension for websites serving businesses that require booking systems.

Download Here:

http://www.jomres.net/index.php?option=com_content&task=view&id=124&Itemid=198

Joomap - JoomlaCode.org

Joomap is a sitemap component for Joomla that shows the normal Menu Structure, Content Categories, Sections and Virtuemart Categories in a hierarchical list. The new version also supports the generation of a Google Sitemaps conformant XML list. It is very easy to install, but users have reported that the site maps often generate errors when submitted to Google. Still, at the moment, it is one of the best site map generators available.

Download Here:

<http://www.koder.de/joomap.html>

Joom!Fish - Joomfish.net

The Joom!Fish project is the official add-on for managing multilingual content within the content management system Joomla!. The learning curve is pretty steep however, and takes some tweaking to get right. However, the end results are fantastic and the Joom!fish extension is easily the best translation tool for Joomla!.

Download Here:

<http://www.joomfish.net/content/blogsection/4/25>

Joomla SEO Extended Patch - [Joomlatwork.com](http://www.joomlatwork.com)

The sef patch extended version is a full Joomla! component that extends the standard free SEF Patch. With the SEF patch extended version you will have full control over the META tags and other settings in regards of search engine optimisation with Joomla!. It's easy to install and easy to get full control over your META tags and other tags within the html head section in relation to Joomla content and menu items. Installation is a breeze, and if your primary means of getting traffic to your site is through search engines, you should give this extension a try.

Download Here:

http://www.joomlatwork.com/products/components/sef_patch_extended.html

Fireboard Forum - Bestofjoomla.com/

The Fireboard is a stylish and powerful extension for Joomla! that is fast becoming the forum board of choice for Joomla! webmasters. However, because its release is pretty recent, there are still a few unresolved bugs, but the developers are working hard at coming up with new versions.

Download Here:

<http://joomlancode.org/gf/project/fireboard/frs/>

JoomlaDesktop Installer Utility - Joomlplug.com

JoomlaDesktop Installer is a free tool which will help you install Joomla in a more secure way, saving you time from corrupted installs! We have compiled the Joomla files into an executable Windows application, Virus Free, with the help of Ioncube Package Foundry! What you need to do is to save and open the executable files provided in the download section, enter the ftp details to your server and that's it, the software will copy the downloaded Joomla version on your server and will let you know when it's finished! How much easier can it get?

Download Here:

http://www.joomlplug.com/Tools/JoomlaStart/JoomlaStart_Desktop_Installer.html

JoomlaStart - Joomlplug.com

JoomlaStart is the ideal extension for technophobics that want to try their hands on Joomla!. JoomlaStart helps you install/upgrade Joomla software much faster by just uploading a single file on your server. And then all you have to do next is to run that file. Functionalities are limited obviously, but is a nifty tool that should give newbies confidence by helping them start on the right foot.

Download Here:

<http://www.joomlplug.com/tools/joomlastart/joomlastart.html>

JoomlaXplorer - [Joomlcode.org](http://joomlcode.org)

joomlaXplorer allows you to edit files, delete, copy, rename, archive and unpack files/directories directly on your server, much like an ftp program. This is another must-have extension for Joomla! and should have been incorporated into the main installation in the first place, according to several users! It does exactly what it's supposed to do without a hitch.

Download Here:

<http://joomlcode.org/gf/project/joomlaxplorer/frs/>

Letterman Newsletter Component - [Thejfactory.com](http://thejfactory.com)

This extension is a subscriber management system and has HTML/image embedding capabilities. It import .CSV and .XML, and has a clean and simple interface, allowing for ease of use even for beginners. It is most suitable for simple sites that don't require much sophistication as its functionalities are limited. It is free as well, so it's worth a try if you need a newsletter on your site.

Download Here:

http://thejfactory.com/component/option,com_docman/Itemid,56/

LinX - [Costatropicalinternet.com](http://costatropicalinternet.com)

This is yet another vital extension if you plan to optimize your site for the search engines. It allows you to easily and conveniently manage your own reciprocal links directory. Visitors to your site can submit their links, but only after adding a link to your site. Categorization of links is allowed, and installation is a piece of cake. Highly recommended.

Download Here:

http://www.costatropicalinternet.com/downloads/linx/com_linx.zip

Mod HTML - [Fijiwebdesign.com](http://fijiwebdesign.com)

Mod_HTML allows you to Add Any HTML or JavaScript code to your Mambo or Joomla Website CMS via a module. This extension is perfect if you wish to add Google Adsense or any other form of Javascript items on your site. It is so uncomplicated that it is easy to overlook how useful this nifty little tool actually is.

Download Here:

<http://fijiwebdesign.com/content/view/74/54/>

iJoomla Magazine - [Ijoomla.com](http://www.ijoomla.com)

iJoomla Magazine allows you to create as many home pages as you wish by creating separate magazines and issues. Each issue will have its own home page as well as its own layout and style. iJoomla Magazine has seven unique modules that make it easy for you to organize your magazine and make it an even better read for your users. Like other Joomla modules, you can display your modules on every available position of your template. Use the modules for navigation and as teasers for different sections of your magazine. Using multiple Joomla! components involves opening sub-menus on the main component menu. iJoomla Magazine comes with a left-side navigation that makes everything much easier

Download Here:

<http://www.ijoomla.com/magazine/edition/Joomla-Components-Modules-iJoomla-Magazine-V-2-0/>

Mosets Hot Property - [Mosets.com](http://www.mosets.com)

This extension allows you to list your and manage your properties easily, whether you are dealing with real estate, vacation rentals, autos, or DVD rentals. In the functionality department, there is still a lot of room for improvement, but response from the the developer has been prompt and helpful. One thing to note is that this extension isn't exactly user-friendly and needs a moderately high level of experience to customize it to its full potential.

Download Here:

<http://www.mosets.com/download/>

OpenSEF - [J-prosolution.com](http://projects.j-prosolution.com)

OpenSEF is a Joomla 1.0.x component that extends Joomla's SEF (Search Engine Friendly) URL mechanism allowing you to define arbitrary, friendly URLs for any of Joomla's content and component items. Useful if your site depends heavily on search engine traffic.

Download Here:

<http://projects.j-prosolution.com/projects/os-projects/download-opensef.html>

perForms - [Joomlancode.org](http://joomlancode.org)

This extension can be used to create forms in seconds, capture data to your database, email data on submit, view captured data in administrator. perForms includes a plugin (mambot) so you can embed your forms directly into Joomla! content, and a Module showing response data in summary or report form. perForms also has CAPTCHA integration, with com_securityimages, and HTML2FPDF and "printer friendly" optional buttons for printing component-based display. It is available in multiple languages and comes with a 54 page user manual, so even the technically inclined should be able to handle it with ease.

Download Here:

<http://performs.org.au/latest>

Phil-A-Form - [Phil-taylor.com](http://www.phil-taylor.com)

Phil-A-Form allows you to generate dynamic forms in Joomla!, without sophisticated programming knowledge. Results can be emailed to anyone, or saved in a database. Phil-A-Form was the worlds FIRST EVER mambo/Joomla! Form Generator, and is extremely beginner-friendly as well. Solid and reliable, a great extension if you need forms on your site.

Download Here:

<http://www.phil-taylor.com/Joomla/Components/Phil-A-Form/>

SEF Advance - [Sakic.net](http://www.sakic.net)

SEF Advance is a component for Joomla! 1.0 / Mambo 4.x which will extend its built-in search engine friendly URL functionality and raise it on a higher level. It works pretty much like OpenSEF, and is an extension to use to make your URLs more SEO friendly. Instead of ordinary Joomla! / Mambo SEF URLs like: <http://www.site.com/content/view/1/2/> which don't tell much about your content you will get URLs in form: <http://www.site.com/section/category/item/>

Download Here:

http://www.sakic.net/products/sef_advance/

JPromoter - [Joomlaequipment.com](http://joomlaequipment.com)

JPromoter is another of those extensions if your traffic is heavily dependent on search engines. It has many functions, like creating SEF URLs, generating sitemaps, controlling external links, and various others that ensure that your site is viewed as a very healthy one by the search engines.

Download Here:

http://joomlaequipment.com/index.php?option=com_content&task=view&id=4&Itemid=10

Taskhopper Task Manager - [Taskhopper.com](http://taskhopper.com)

TH is a ticket system/project management tool that's simple and fast. It can be easily adapted to fit different industries. It can manage multiple tasks for multiple people, located in multiple places. Installation is a breeze and is a must for sites that involve a large number of team members that are only able to communicate online.

Download Here:

<http://taskhopper.com/one1>

VirtueMart - Virtuemart.org

VirtueMart is the leading Online-Shop solution for Joomla! (more than 1.5 Million downloads so far). You can download, use and modify it without any restrictions, for free, just like Joomla!. VirtueMart is not a stand-alone script, but a Plug-in and requires the PHP Content Management System Joomla!. Multiple translations can be readily found in the included language pack.

Download Here:

<http://www.virtuemart.org/>

Project OpenWP - J-prosolution.com

WordPress and Joomla! share certain capabilities, and their individual strengths lie in their principal focus. Joomla! does content management very well and WordPress does blogging very well. This extension integrates WordPress into the Joomla! framework. The comments, xml, rss post and comment feeds as well as ping-back and trackback features of wordpress, all of which are not enabled by Joomla!, is a great addition.

Download Here:

<http://projects.j-prosolution.com/projects/os-projects/project-openwp.html>

Expose Flash Gallery - JoomlaCode.org

This extension has a clean and easy-to-use interface, and is suitable for beginners as well as veterans. It creates slideshows of your pictures on the web, and can be linked directly to an album. Easily one of the best, if not the best choice of extension for creating flash galleries on your site.

Download Here:

<http://joomlaCode.org/gf/project/expose/frs/>

Gallery 2 Bridge - 4theweb.nl

Gallery 2 Bridge is another popular gallery extension for Joomla!. However, there have been reports of users encountering difficulties installing it, so beginners might require some help in getting things set up.

Download Here:

http://joomlaCode.org/gf/project/gallery2_bridge/frs/

gigCalendar - [Gigcalendar.net](#)

gigCalendar is a free solution for maintaining a website's touring calendar. Maintaining a calendar for event promotion on the Internet has never been easier! gigCalendar is an events calendar that is tailored for musicians, producers, venues, bands and artists but it also can easily be used as an events calendar for anything at all.

Download Here:

http://joomla.org/gf/project/gigcalendar/frs/?action=FrsReleaseBrowse&frs_package_id=214

AdSense Module (ClickSafe - Special Edition) - [Joomlaspan.com](#)

This extension is simple solution for implementing Google AdSense ads in Joomla!. As they are, AdSense ads are supposed to be easy to insert by themselves, but this extension provides other useful functionalities like blocking certain IP numbers from seeing Google ads. This helps prevent click fraud as you cannot accidentally click on your own ads. It also has chameleon codes that can make the ad colors automatically change with each page load, as determined by you.

Download Here:

<http://www.joomlaspan.com/joomla-downloads/Download/-JoomlaspanModules/GoogleAdSenseRelatedModules/>

Blogg-X - [Iobinary.com](#)

Blogg-X is a cross platform (OS X, Windows XP, Linux) content management tool for websites based on the Joomla! CMS. Blogg-X runs locally on your computer as a desktop application. This shaves a lot of time required while waiting for process to load. You can even use it to manage images and write posts for blogs. Installation is a breeze as well, so if time shortage is an issue for you, this might just be the answer to your prayers.

Download Here:

http://www.iobinary.com/component/option,com_remository/Itemid,35/func,select/id,2/

Fabrik - [Fabrikar.com](#)

Fabrik, formally known as mosForms, is an open source Joomla form and database management component. Fabrik gives people the power to create applications that run inside Joomla without requiring knowledge of MySQL and PHP, all from within the familiar Joomla administration interface. Fabrik provides you with all the tools that you need to create applications that range in complexity from simple contact forms to complex applications such as a job application site or bug tracking systems.

Download Here:

http://joomla.org/gf/project/fabrik/frs/?action=FrsReleaseView&release_id=849

Stalytics - [Stalyticsdemo.com](http://www.stalyticsdemo.com)

This Joomla component offers the user more than 30 different analyses for a specific and efficient analysis of the visitor behavior. The resulting data is efficiently saved in the database, in order for Stalytics to keep the database size small, even after long usage. Animated Flash analyses, entry and exit pages, funnel analyses and export interfaces for XML and CSV reports, as well as language support for German, English, French, Dutch, Italian, Danish, Turkish, Spanish and Swedish are just a few of the comprehensive features in Stalytics.

Download Here:

<http://www.stalyticsdemo.com/>

ChronoForms - [Chronoengine.com](http://www.chronoengine.com)

Chronoforms is an extension that allows you to build your own forms with ease. You can edit the forms using HTML editors easily

Download Here:

http://www.chronoengine.com/component/option,com_docman/task,cat_view/gid,19/Itemid,34/

josSmartyPants- [Phpnet.us](http://phpnet.us)

The mambot josSmartyPants is based on PHP SmartyPants Typographer---an extension to SmartyPants adding support for different quotation marks as well as for converting normal spaces to unbreakable spaces and thus preventing inappropriate line breaks. SmartyPants can perform the following transformations: Straight quotes (" and ') into "curly" quote HTML entities; Backticks-style quotes (` ` like this") into "curly" quote HTML entities; Dashes ("--" and "---") into en- and em-dash entities; Three consecutive dots ("...") into an ellipsis entity. SmartyPants does not modify characters within , , , or tag blocks.

Download Here:

<http://physicist.phpnet.us/2007/06/11/jossmartypants-mambot/>

JoomVR Panorama - [Joomvr.caiborghoff.fot.br](http://joomvr.caiborghoff.fot.br)

This extension allows to include 360 degrees panorama images inside a module. It also provide the ability to specify 5 hotspots with configurable links, so you can link several copies of the module together or to external sites to create a virtual tour. You can also custmize the size of the applet, speed of auto-panning and the display of control toolbar through the module params.

Download Here:

http://joomvr.caiborghoff.fot.br/index.php?option=com_docman&task=doc_details&gid=8&Itemid=2

JoomlaBoard Karma MenuItem - [Steve-o-meter.com](http://steve-o-meter.com)

This Community Builder Plugin will show a menu item of users karma requires joomlaboard and community builder

Download Here:

http://steve-o-meter.com/component/option,com_remository/Itemid,0/func,fileinfo/id,18/

Joomla SEF Patch - [Joomlatwork.com](http://joomlatwork.com)

This extension is another must-have for webmasters who want to work SEO into their sites. It doesn't alter the URL's (no other categories available) but improve's the joomla core code into good SEO code! Please read the instruction on the joomlatwork.com website before mailing us with questions about the URL's and the patch. Along with Community Builder, JoomBackup and a few others, this should be part of any Joomla install.

Download Here:

<http://www.joomlatwork.com/downloads/>

Quick Preview Button - [Eyezberg.com](http://eyezberg.com)

Adds a new button next to "Messages" and "Online" icons to quickly access the sites frontend. No more submenus, button is always in easy reach from any screen, even when the menu is disabled, so for example, you edit a content item, hit Apply, and take a look at the live site to check. Please publish this module to "header" position.

Download Here:

http://www.eyezberg.com/dev/mod_preview.zip

sh404SEF - [Siliana.net](http://siliana.net)

sh404SEF rewrites Joomla URL to a more user-friendly format for your site visitors, as well as for search engines). It makes use of plugins to process the various components used in a site. Plugins for VirtueMart, Fireboard, Community Builder, iJoomla Magazine, and more are included. It can also use sef_ext files for OpenSEf and SEF Advanced. It is also compatible with Joomfish and SEO-savvy webmasters should definitely check this out.

Download Here:

<http://joomla.org/gf/project/sh404sef/frs/>

Sigsiu Online Business Index 2 (SOBI 2) - [Sigsiu.net](http://www.sigsiu.net)

Sigsiu Online Business Index 2 is a directory component for the WCMS Joomla! to display entries of companies and clubs. The entries are divided into categories, which can contain subcategories. One entry can be entered in up to five categories. The companies/clubs enter themselves in the index. A security code (security image) is available for spam protection. Registered users can modify or delete their entries. SOBI2 is said to be the best directory manager for Joomla!.

WikiBot - [Theinevitable.com](http://www.theinevitable.com)

This Bot integrates the successful opensource CMS Solution, Joomla, with the free Encyclopedia, WikiPedia. When activated `[[wikitagged]]` words in Joomla contents will become hyperlinked to WikiPedia articles. This is extremely useful for content sites as it provides a handy source of reference for jargons.

Unsolicited Testimonials:

Justin,
Thanks for keeping me on your list. I will tell you -- this email of yours is one of the most innovative I've seen in awhile! I love your passion -- it comes through. Keep up the enthusiasm! Someone once told me that "*Enthusiasm is knowledge on fire.*" Keep that knowledge burning baby!

Have a great week!

Sincerely,
Nathan Bickel

Hi Justin,

Please keep me on your mailing list. I just bought your tutorials this weekend and I must tell you it is the first Internet-related tool I have been truly happy to have purchased. The price point is spot-on, too. It's a very manageable price and the value you get is unmatched.

What is the name of the presenter?

Thanks,
MoreDomains.com

Thank you Justin
Not only do I NOT want to get off your list, I actually want to get to know you better. You represent a side of the web marketing population that I wish was the predominate side. Alas as with most things in life the really good stuff is usually hidden and woefully in the minority. You are a breath of fresh and air and vision of hope for the industry. I consider myself blessed to have come across you material and to now be on your mailing list...

Have a great day
David Weaver
